## HOUSEHOLD TIPS

### KEEP OUT PETTY PESTS!

Ever wondered why pests always seem to be attracted to your home? Take the first step by observing your surroundings and identify the root of the problem. Read on to find out how you can tackle this pesky business!

#### ★ Remove stagnant water

Turn away mosquitoes by turning over your pails. For avid plant lovers, changing the water in vases and pots on alternate days will reduce the possibility of breeding. Fallen leaves of plants placed along corridors must also be cleared as these leaves could collect water, or cause blockages to drains which would result in the buildup of stagnant water.

#### ★ Keep your kitchen tidy

Housekeeping matters! Wipe off all crumbs and spills to prevent bugs from feasting on them. Make an effort to throw away food scraps properly and rinse recyclables such as plastic containers and aluminum drink cans thoroughly. Any leftover sweet bits will leave ants longing for more.

#### ★ Do not clutter

Cockroaches are fond of dark spaces and will explore all corners of unwanted items. Clear newspapers and recycle empty boxes promptly. Remember to organise your belongings, and have a designated basket for used laundry.

#### ★ Clean up after your pets

Flies find solace in pet's waste. For our common hygiene and your pet's well-being, monitor your pet's litter box diligently to remove all traces. Wash their toys, blankets or cages periodically.

#### ★ Clear rubbish frequently and scrub the bins

Line bins with trash bags, and tie them tightly before disposal. There may be occasional tears in the bags leading to spillage. Scrubbing these bins will eliminate smells and prevent insects from infesting!
